Preface
I. Introduction 1
II. Peirce’s Logic of Relations 3
III. Time Symmetry, Advanced Potentials, and Needle Radiation 11
IV. Physical Preliminaries 13
V. Triadic Relations and Elementary Particles  
   A. The Diagrammatic System 15  
   B. Quantum Correspondence 21  
   C. Internal Structure of Elementary Particles 30  
   D. Interactions and Continuity 34
VI. A Triadic Quantum Computer 34
VII. Concluding Remarks  
   A. Summary 45  
   B. Determinism Versus Chance 45  
   C. Hidden Variables 46  
   D. Action at a Distance 46  
   E. Quantum Jumps and Collapse of the Wave Function 46

FIGURES
1. Peirce’s graphical representations of elementary relational forms generalized on both subject and predicate aspects. 5
2. Peirce’s general sign relation expressed in his graphical logic of relations. 9
3. Triadic history of a particle. 16
4. Triadic history of an antiparticle. 17
5. Triadic history of particle-antiparticle annihilation. 18
6. PBK diagram for interaction of an electron and a photon. 20
7. Quantum representation of an EP history. 23
8. Feynman diagram of lowest order for Compton scattering. 24
9. PBK diagram for annihilation of an electron and a positron. 25
10. PBK diagram for the repulsive Coulomb interaction (Møller scattering). 26
11. PBK diagram for the attractive Coulomb interaction (hydrogen atom). 28
12. PBK diagram for emission of radiation from a hydrogen atom. 29
13. Simplified PBK diagram for electron-photon interaction. First trisistor configuration. 38
14. PBK diagram for photon annihilation. Second trisistor configuration. 38
15. PBK diagram for creation of entangled photon pair. Third trisistor configuration. 40
16. PBK diagram for electron-antiphoton interaction. Fourth trisistor configuration. 40
17. Elementary logic circuit using trisistors. 42

TABLES
1. Peirce’s generalization of the subject aspect of relations. 4
2. Elementary bonding patterns in Peirce’s graphical relational logic. 6
3. Peirce’s relational principles. 7
4. “Truth table” for logic circuit of Fig. 17. Two polarization state differences. 43
5. “Truth table” for logic circuit of Fig. 17. Three polarization state differences. 43
